

## From the fisherman's net, straight to your plate...

Kalymnos, the famous island of the fishermen and the Sponge divers, is home to the largest fishing fleet not only of Greece, but of the whole South-East Europe.

It currently numbers 658 fishing vessels.

This great tradition was the fundamental drive behind the creation of "Panagia Ipapanti" Cooperative company in 2012, by the wives of the Kalymnos fishermen. Their objective was to create gourmet products of exceptional nutritional value and help promote further the development of the fishing industry of the island.

The daily supply of fresh fish from the local fleet guarantees the continuous production of our delicacies.

Using the traditional method of smoking our fish with beech wood, and with the addition of locally grown aromatic herbs like thyme, savory and oregano from the mountains of Kalymnos, our products satisfy the most delicate pallet in terms of their taste and aroma.

For our cured fish, we use only natural, unprocessed sea salt, ensuring the quality of our products is of the highest level.

We use our know-how to its full extend throughout the whole process of preparing our fish products.

**Our aim is to produce unique products. We are the only producer of Swordfish Bottarga(Roe) in the world, made from the roe of wild Swordfish caught in the Aegean sea.**

All of us at **Kalymnos Sea Food** take utmost pride and joy in what we do, and we guarantee the highest standards of quality of our sea food product line.

We hope you enjoy the experience of tasting our products.
